PRESS RELEASE

CLASSIC WIRE & CABLE NOW STOCKING POWERGUARD® COPPER MEDIUM VOLTAGE EPR CTS CABLES

Miami, Florida - Classic Wire & Cable (CWC) is proud to announce the expansion of its product portfolio by now stocking PowerGuard® Medium Voltage (MV) EPR copper tape shield (CTS) cables—ensuring faster, more reliable access to critical infrastructure solutions for industrial and data center markets. Designed to support the demanding requirements of critical infrastructure, PowerGuard® cables are now available through Classic's nationwide distribution channels.

PowerGuard® copper MV EPR cables are engineered for consistent performance and durability in applications from 5 kV to 15 kV. Featuring a CTS construction, these cables provide a uniform electric field, manage voltage stress, and ensure a reliable ground path for fault currents. Suitable for direct burial, duct installation, or exposure to sunlight, sizes 1/0 AWG and larger are approved for cable tray use and marked "FOR CT USE".

"Adding PowerGuard® copper EPR cables into our stocking program reinforces Classic's commitment to being a dependable partner when timing and performance are critical," said George Merritt, Vice President of Sales and Marketing at Classic Wire & Cable. "From consistent inventory and superior customer service to proven cable performance, this offering is another way we ensure our customers can count on Classic."

Backed by UL Listings and engineered for long-term performance, PowerGuard® cables meet the highest standards for medium voltage applications. With consistent stock maintained in Classic Wire & Cable's Texas facility, orders are ready to ship in days—not weeks—supporting faster deployment and cost efficiency.

CWC is a trusted supplier of high-quality wire and cable products serving the utility, industrial, data center, commercial, residential, and renewable energy markets—sold exclusively through electrical distributors. Known for responsive service and dependable delivery, CWC also offers value-added solutions including pulling eyes, paralleling, custom cuts, and same-day nationwide shipping from strategically located distribution centers that ensure our products arrive where our customers need them, when they need them, prepared exactly how they need them. Our commitment to quality and UL Listed products has earned us a strong reputation across the industry.
