

What is Mobile Home Feeder?

Mobile Home Feeder (MHF) cable is designed to deliver power from the service entrance to distribution panels in mobile homes and manufactured housing. Its flexible construction supports easier handling and efficient installation while providing reliable power distribution.

Mobile Home Feeder

Our Inventory

Classic Wire stocks MHF cable nationwide to support mobile and manufactured home power distribution projects. With inventory strategically positioned in Pennsylvania, Texas, and California, MHF is available for same-day shipment on orders placed before 11:00 AM local time and fast delivery across North America.

Count on Classic for Mobile Home Feeder Cable

CABLE CONSTRUCTION
